神鹰航空飞往济南的乘客信息

PASSENGERS DEPARTING FROM GERMANY

If your journey starts in Frankfurt, you need to present your passport and all other required documents at check-in. This includes a green health code that your local Chinese embassy or consulate can provide.

You may use any approved COVID testing center for your flight with Condor.

If you test positive on the day of the flight, please contact your travel agent for refund or re-booking options.

PASSENGERS CONNECTING IN FRANKFURT

If your journey starts at another airport and you arrive in Frankfurt by plane to connect to Condor's flight to Jinan, you need a green health code from your local embassy or consulate and a double COVID test during your transit in Frankfurt for the onward green code.

You need to inquire which testing centers are approved by the Chinese consulate in Frankfurt for transit testing. You may need to make an appointment at your selected facility in advance, and arrive as early as possible to get the test results in time for applying for the onward green code to Jinan. We recommend to take the test before 11:00am.

If you arrive from outside the Schengen area, and have no EU passport or visa, you have to use the Frankfurt Airport Transit Testing Center at gate B60. For advance reservation, please go to:
